Types of Tracklander Mounts

Gutter Mount

Mounts to vehicle gutters, incorporating supports that strengthen the gutter and naturally follow the profile, providing full protection against damage to the vehicle.

Removable Mount

Easily bolts to existing mount points, provided in the vehicle roof. Quick, strong and you can still clean your vehicle's roof.

Track Mount

Permanent tracks are fixed to the roof panel, providing a strong mounting. Fully sealed against corrosion and leakage using a specially designed automotive sealant. Weight is distributed evenly over the roof surface.

Rail Mount

Takes advantage of factory fitted rails by clamping to existing railing. Quick and easy attachment and removal.

Open Ended Tracklander

Open-ended models are made for carrying long items. Tradesman by the week - camper on the weekend.

Tent-Topper Tracklander

This Tracklander comes with no top rail around the rear section of the rack to accommodate a roof top tent. It also comes complete with a "high impact resistant" wind deflector and mesh floor.

Steel Tracklander

Most sizes are available in steel. Steel racks are double protected against corrosion. Suitable for heavy duty applications.

Tracklander SUV

The Tracklander SUV is a stylish, smaller version of the legendary Tracklander 4WD Roof Rack. This rack comes with the distinctive "high impact acrylic deflector" for greater aerodynamics and an overall streamlined, upmarket appearance. Its strong mesh base is an excellent platform for any size of load and is easy to tie down to.

Removable Ladders

Ladders provide a safe and easy way to load and unload your vehicle. The removable ladder can be hooked onto the Tracklander wherever you need to access your load. The ladder can also be stored on the rear of the rack, without taking up valuable cargo space.

Fixed Ladders

Designed to follow the contours of your vehicle, the ladder bolts directly onto the chassis of your vehicle. There is no need for drilling into the bodywork and the ladder will flex with your vehicle movement.

Travelling Accessories - Customise your rack for maximum use

Double Jerry Can Holder

Used for plastic and metal jerry cans. Rubber lining protects against vibration. Can be padlocked.

Shade Clamps

Bolts on quickly. Securely attaches your awning.

Pipe Clamps

Available in 100mm & 150mm sizes. Ideal way for storing fishing rods.

Spare Wheel Storage

Spare Wheel J-Bolt

An ideal, quick fix for temporarily relocating your spare wheel.

Recovery Gear Storage

Hi Lift Jack Holder

A very handy accessory used to store your kangaroo jack - a secure and sturdy locking system is also available.

Mining Accessories

Spotlight / Aerial Holder

No need to drill holes in your Tracklander. Attach multiple spotlights and aerials with ease.

Spare Wheel T-Bolt

The safest way to carry a spare wheel in a roof rack while off road.

Universal Holder

Attach shovels safely and securely without using any cargo space.

Beacon Plate

Easily add a beacon without drilling into the Tracklander.
